Infinity Ultra2 Headlight

PORTABLE - The Infinity Ultra2's outstanding edge-to-edge clarity, pure white beam, and hands-free operation allows you to focus on your procedures, while the lightweight lithium-polymer battery provides power for all day use.

BRIGHT - With a powerful intensity of over 8,000 foot candles or 86,400 lux, this is the brightest light you will ever need. Also available is our Original FireFly LED with 2,400 foot candles of intensity at a very affordable price.

COMFORTABLE - With the new Infinity Ultra2 you'll experience extremely bright, shadow-free, long-lasting illumination with unrestricted mobility that enables you to work with precision while enjoying complete comfort with a weight under 1 ounce (28g).

8,000 ft./candles of
intensity from under
1 oz / (28 g)!

- Get as much as \$300 in savings when you purchase a loupe and headlight together.
- Choice of any SheerVision TTL or Flip-Up Loupe
- Choice of any SheerVision Headlight System
- Ask your SheerVision representative for additional information.

"I am so pleased with my purchase."

I cannot express how pleased I am with the loupes. I have used loupes for over a decade now but these loupes are by far the most comfortable and easy to get on with I have ever experienced. The lenses give a sharp and precise picture showing fantastic detail and yet are extremely comfortable to wear.

The Infinity system is extremely good. I have used several other brands of light and none of them have had the flexibility of being portable - no more dragging the light box off the surgery top when I forget to unplug!

As for the brightness and colour balance - I have not had a headlight of such intensity before - incredible brightness. Thank you for your excellent customer service; I would not hesitate to recommend you or your company to any dental professional wanting to improve their practice." Dr. Ian R. Jones, Royal Air Force (UK)
